Rockaway; also single and double Harness, Biankets,
Robes, &c.
N. B.—SALE POSITIVE, RAIN OR SHINE.

CARRIAGE BULLETIN

BREWSTER, of Twenty-fifth street.

Fifth avenue, corner Twenty-seventh street.

To attain the highest speed a wagon should follow the horse in a direct line. This can only be accomplished by the wheels running plumb, any inclination in the axis of spread destroys the plumb of the spoke and gives a lateral motion to the wheel, causing it to push out sideways. This lateral movement greatly increases the riction, to be overcome by the horse, with a consequent waste of power; thus detracting from his speed in direct proportion to the spread of the axis.

With our Vertical Steel Plates we have been enabled to build wagons of the lightest weight, running so absolutely true that we have yet to hear the first complaint from our patrons.

See certificate from General McClellan:

New York, June 1, 1871.

Gentlemes.—

GENTLEMEN — New 10st, vinit.

I have carefully examined your Patent Vertical Steel Plate Axie. I find that the addition of the Vertical Plate renders the axie about two and a half (2)₂ times as siti as it would be without it.

Very respectfully,

GEORGE B. McCLELLAN.

GEORGE B. McCLELLAN.
